

Project ①

① enable Passwordless Authentication betn Jenkins & Ansible Server to tx data ~~between~~ from Jenkins Server to Ansible server with help of publish-over-ssh plugin

② Also used Same plugin to execute Playbook on Ansible server to deploy new version on web servers

Note → after installing plugin → configure in Jenkins to tx data

error ✓

→ don't forget to restart SSH after configuration changes

→ Playbook to tx data from Ansible to web services

→ create webhook

Step should be

↳ Send file & execute command over SSH
